WASTEWATER TREATMENT

- Domestic and container cleaners
- Municipal and industrial treatment plants
- Membrane treatment plants
- Aeration systems, mechanical pre-treatment, sludge drainage
- Grease traps, oil separators
- Lifting equipment and regulating gates
- MiFlo microbubble flotation
- Sedimentation and dosing tanks (circular, ClariVac)
- Electrocoagulation

RAINWATER PROGRAM

- Rainwater tanks
- Accessories

WATER TREATMENT

- DAF flotation
- Leopold drainage system
- Filtration material Filtralite
- Membrane microfiltration AMAYA
- Granulated activated carbon WG12
- Water disinfection
- Micropollutant removal
- EP-C clarifiers, lamellar separation
- Atmospheric and pressure filters

OTHER SERVICES

- Water jet cutting
- Laser cutting
- Customized plastic and steel fabrication
- Edging press

WATER RECYCLING

- Membrane technology
- Advanced oxidation processes
- GAC sorption
- Pilot plant testing
- SWOT analyses

For all delivered services we offer turnkey processing of complex water management.

We listen to your needs, requests and limitations.

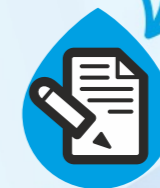

We will come to see the place of realization.

We prepare a tailor-made proposal for an optimal solution.

We will verify the effectiveness of the proposed solution by pilot testing.

We can help with the project documentation.

We will install and launch the technology for full operation.

We provide technical support during operation.
