

# DRINKING WATER WHEREVER IS NEEDED

Natural disasters

Humanitarian acts

Long-term drought

Military operations

Cultural events

Sports events

## BENEFITS

- Fully mobile device
- Compact and robust solution
- Quick commissioning
- Suitable for various surface and underground water sources
- High quality drinking water
- Automatically adjusts to changing water source quality
- Easy shutdown without membrane maintenance
- Lifetime of the ceramic membrane is over 25 years

# MOBILE WATER TREATMENT PLANT

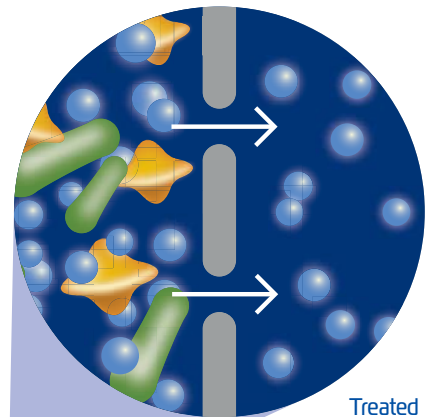

envi-pur

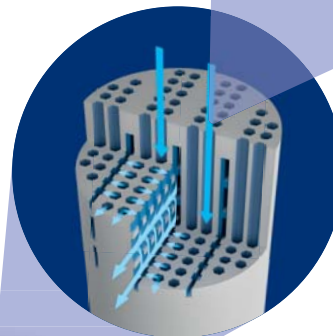

## AMAYA M 5

The AMAYA mobile water treatment plant based on ceramic membrane filtration is designed to produce high quality drinking water. The AMAYA water treatment plant is a 100% reliable barrier to turbidity, microorganism, etc. The result is high quality drinking water. The flexibility and uniqueness of AMAYA makes it a Hi-tech solution.

Bacteria, turbidity and organic pollution

Treated water

Water flow through the ceramic membrane

## 2 MINUTES TREATMENT PROCESS
